Probabilistic Systems Analysis and Applied Probability Electrical Engineering Program | Department of Electrical Engineering

The College of Engineering and Applied Science at the University of Colorado Colorado Springs is an innovative, exciting, and dedicated collection of faculty, staff, and students focused on the science and application of engineering and computer science. The College …

The Electrical Engineering Program begins in the second year of undergraduate studies after completing the required first year engineering courses. Students will graduate with a Bachelor of Applied Science in Electrical Engineering.

Electrical Engineering at the Harvard School of Engineering studies systems that sense, analyze, and interact with the world. Electrical Engineers invent devices for sensing and actuation; they design physical substrates for computation; they create algorithms for analysis and control; and they expand the theory of information processing.

Welcome to 6.041/6.431, a subject on the modeling and analysis of random phenomena and processes, including the basics of statistical inference. Nowadays, there is broad consensus that the ability to think probabilistically is a fundamental component of scientific literacy. For example: The concept of statistical significance (to be touched upon at the end of this course) is considered by the The College of Engineering & Applied Science hosts dozens of world-class research centers, labs and multiple individual research initiatives. Through our research, we solve real-world problems. As a student at either the graduate or undergraduate level, you will have the opportunity to work with faculty on leading-edge research.

The Master of Applied Science (MASc) in Electrical and Computer Engineering Program is for students interested in pursuing advanced studies and research in Biomedical Technologies, Communications Systems, Computer and Software Systems, Energy Systems, or Micro and Nano Technologies. Electrical and Computer Engineers develop computing systems, from chip architecture to mobile

ISE is distinctive because its tools can be applied to any business in any setting, from production to services, in either the private or public sector. Materials Science & Engineering Accredited since 1936, the department offers one of the nation’s leading materials science and engineering programs.

BS '07, MS '10, electrical engineering "To the aspiring Black engineers, there is more than enough space in the industry for your knowledge and creativity and your input is needed, wanted and valued." School of Engineering and Applied Sciences
