Roy and Jan have assembled a timely snapshot of our current understanding of ecotourism, both as a concept worthy of scientific inquiry and as an increasingly significant segment of global commerce and industry. A terrific piece of work! Sam Ham, University of Idaho, US In the 30 or so year since it became established in the tourism literature and in tourism practice, ecotourism has attracted as many proponents as opponents. This Handbook now brings together some of the leading scholars worldwide in this field, to explore the current position of this form of tourism. In doing so, it offers serious critiques, it explores meanings and paradoxes, it offers best practices and it looks to the future. It is the Handbook for one of tourism's fastest growing and controversial sectors. David Airey, University of Surrey, UK This is a most welcome and needed book. With a very strong editorial team and contributing authors, the Handbook covers all the key issues of ecotourism. It cuts through the confusion surrounding the much-misunderstood concept of ecotourism, clearly dealing with definitions, concepts and research issues. The Handbook is particularly welcome for its focus on the visitor experience, a strength of the editors, and for clearly linking the theory of ecotourism with practice in the field. Christopher Cooper, Oxford Brookes University, UK This Handbook brings together contributions from over forty international experts in the field of

ecotourism. It provides a critical review and discussion of current issues and concepts it challenges readers to consider the boundaries of what ecotourism is, and could be. The Handbook provides practical information regarding the business of ecotourism; insights into ecotourist behaviour and visitor experiences; and reflections on the practice of ecotourism in a range of different contexts. The Handbook is designed to be a valuable reference book for tourism scholars and researchers.

This book aims to encourage a more reflective, multidisciplinary approach to public safety, and the ‘reenfranchisement’ of those affected by this new phenomenon. Over the past decade health and safety has become a major issue of public interest. There are countless stories of health and safety activities interfering with public life, preventing some beneficial activity from taking place – even creating absurd or dangerous situations. On the one hand, risk assessment, properly conducted, is highly beneficial – it saves lives and prevents injuries. But on the other, it can damage public life. Why has this come about, and does it have to be like that? The authors examine the origins of the problem, look critically at the tools used by safety assessors and their underlying assumptions, and consider important differences between public life and industry (where the approaches largely originated). They illuminate the whole with an analysis of legal requirements, attitudes of stakeholders, and recent research on risk perception and decision making. The result is a profound and important analysis of risk and safety culture and a framework for managing public safety more effectively.

Controversial Issues in Adventure Programming offers an engaging approach to the consideration of enduring, current, and emerging issues in the field. Written primarily for upper-level undergraduate and graduate students, the text presents 20 issues in a debate format, challenging students to participate in critical discourse concerning these issues as practitioners in the field of adventure programming. Respected authors Bruce Martin and Mark Wagstaff have assembled a team of more than 50 contributors from around the globe to reassess some of the underlying assumptions on which adventure programming is based. They have critically examined implications of new developments for emerging practice and discussed how best to position the field of adventure programming in addressing broader societal concerns. To set the stage for the debate, each issue is prefaced with a general overview, including the evolution of the issue and its significance in light of broader social concerns. Then, contributors present the pros and cons of each issue. A debate format helps students develop an understanding of the key points around each issue while also becoming familiar with current research pertinent to these issues. This approach also encourages students to grapple with these issues and begin to develop their own informed, thoughtful perspectives as they prepare for careers in adventure programming. Controversial Issues in Adventure Programming is divided into two parts. Part I begins by discussing issues of ongoing concern in the field, including the certification debate, motorized versus nonmotorized forms of outdoor recreation, and program accreditation. In part II, contemporary and emerging issues are presented, such as the use of online educational programming in the field of adventure programming. As a reference for practitioners and policy makers, Controversial Issues in Adventure Programming offers new and updated perspectives on enduring and emerging issues as well as a synthesis of the most recent related scholarly literature. In addition, the text serves as a resource in understanding how the adventure programming industry can contribute to addressing issues of broad concern in society, such as public health, global climate change, stewardship of public lands and waterways, and education reform. Controversial Issues in Adventure Programming encourages readers to participate in some of the central debates occurring in the field. In particular, this timely resource will help students broaden their understanding of the field as they critically examine and respond to a range of enduring, contemporary, and emerging topics in adventure programming.

**Safety, Risk and Adventure in Outdoor Activities**

This book approaches the prevention of fatal incidents in outdoor education and related fields through detailed study of past tragedies. Although safety in many fields is built on accumulated lessons from past incidents, tragedies on school or youth group camps and excursions are so infrequent and so widely scattered that knowledge from previous incidents can elude those who would benefit. Nevertheless, the emergence of unlearned lessons from the past weighs heavily when those affected by a tragedy judge whether an incident should have been prevented. This book provides a foundation for a detailed and comprehensive understanding of fatality prevention in outdoor education, and in youth camps and excursions. It compiles, examines, and analyses information on fatal incidents that have occurred over many decades, involving many kinds of groups and endeavours, from around the globe. No previous work has attempted this task.

"'Bureaucracy is the reason for the decline in school trips'. A statement often quoted. But it is a myth that there is a decline in school visits It's competent people, not paperwork, that make visits safer' - Ian Park, ex-Chairman, Outdoor Education Advisers' Panel 'Every man and woman who is involved in the development or education of young people - however slightly - should be chained to one of the Barns of Bynack and not released until they have read this book cover to cover' - Alan Bantick, wildlife conservationist, lecturer, photographer and guide 'Bob Barton's balanced and well thought out book will help anyone involved with the planning and management of outdoor activities for young people. Bob explores the issues that need to be considered when developing and implementing outdoor policies and procedures, in an interesting and thought provoking style, drawing on his wealth of outdoor experience' - Peter Westgarth, Chief Executive, The Duke of Edinburgh’s Award ‘This book fills a gap which sorely needed filling. The safety versus adventure debate is discussed in a thoroughly refreshing way and should inspire a new generation of teachers and youth workers to take their charges into the great outdoors. The book should be required reading for every Health and Safety Officer throughout the land to improve their understanding of what Adventure Educators are trying to achieve’ - Doug Jones, County Officer, Outdoor Education and Adventure Activities, Bedfordshire County Council ‘A distillation of years of experience in adventure activities and an essential guide to getting the proper balance between adventure and safety’ - Nick Barrett, Chief Executive of the Outward Bound Trust Providers of outdoor education must strike the right balance between adventure and security. Effective risk management enables providers to deliver lasting educational value without breaching their moral and legal duties of care. This practical guide shows how genuinely adventurous outdoor activities can be provided to acceptable standards of safety. Drawing on the author’s own experience as an expert mountaineer, instructor and consultant, the systems and processes of successful outdoor adventure are clearly explained using real life examples and case studies. Bob Barton is Safety Adviser to the Outward Bound Trust and works as a consultant on the management of adventure activities.

In May 1993 the British Mountaineering Council met to discuss the future of high altitude tourism. Of concern to attendees were reports of queues on Everest and reference was made to mountaineer Peter Boardman calling Everest an ‘amphitheater of the ego’. Issues raised included environmental and social responsibility and regulations to minimize impacts. In the years that have followed there has been a surge of interest in climbing Everest, with one day in 2012 seeing 234 climbers reach the summit. Participation in mountaineering tourism has surely escalated beyond the imagination of those who attended the meeting 20 years ago. This book provides a critical and comprehensive analysis of all pertinent aspects and issues related to the development and the management of the growth area of mountaineering tourism. By doing so it explores the meaning of adventure and special reference to mountain-based adventure, the delivering of adventure experience and adventure learning and education. It further introduces examples of settings (alpine environments) where a general management framework could be applied as a baseline approach in mountaineering tourism development. Along with this general management framework, the book draws evidence from case studies derived from various mountaineering tourism development contexts worldwide, to highlight the diversity and uniqueness of management approaches, policies and practices. Written by leading academics from a range of disciplinary backgrounds, this insightful book will provide students, researchers and academics with a better understanding of the unique aspects of tourism management and development of this growing form of adventure tourism across the world.

**Health and Safety, Environment and Quality Audits**

Internal auditing is an essential tool for managing compliance, and for initiating and driving continual improvement in any organization’s systematic HSEQ performance. Health and Safety, Environment and Quality Audits includes the latest health and safety, environmental and quality management system standards – ISO 9001, ISO 14001 and ISO 45001. It delivers a powerful and proven approach to risk-based auditing of business-critical risk areas using ISO, or your own management systems. It connects the ‘PDCA’ approach to implementing management systems with auditing by focusing on the organization’s context and the needs and expectations of interested parties. The novel approach leads HSEQ practitioners and senior and line managers alike to concentrate on the most significant risks to their objectives, and provides a step-by-step route through The Audit AdventureTM to provide a high-level, future-focused audit opinion. The whole approach is aligned to the international standard guidance for auditing management systems (ISO 19011). This unique guide to HSEQ and operations integrity auditing has become the standard work in the field over three editions whilst securing bestseller status in Australasia, Europe, North America and South Africa. It is essential reading for senior managers and auditors alike – it remains the ‘go to’ title for those who aspire to drive a prosperous and thriving business based on world-class HSEQ management and performance.

This collection of essays is concerned with the experiences children have within the supervised worlds they inhabit, as well as with architecture and landscape architecture. International examples of innovative childcare practice are illustrated together with the design processes which informed their development. The emphasis here is on new and experimental childcare projects which set-out to reassert the rights of children to participate in a complex multi-faceted world, which

is no longer available to them, unless under adult supervision. Research supports in depth recommendations regarding the ideal children's environment, across a range of contexts and dimensions. Until recent times, the needs of children within the urban environment were largely ignored. There is little tradition and no broadly agreed contemporary architectural or landscape theory as to how children should be provided for, beyond a limited functional agenda. There is a sense that architecture for childhood is not taken seriously; it is either whimsical and ephemeral or largely designed for adults, an adjunct to the more important business of adult needs and aspirations. Yet children access much of their education and development through play and social interaction with their childhood counterparts. The spaces in and around children’s daycare centres, schools, supervised parks and other dedicated children’s environments are the subject of this collection. As more and more purpose designed buildings and gardens for children are opened, the need to listen to children and their carers is becoming more apparent. Mark Dudek gathers together a number of internationally recognized experts in the field of childcare environments to write about different aspects of the landscape. They have been chosen in particular because of their background in enquiring, research orientated work, both theoretical and practical. They listen to and watch children. Contributors have considered the child’s environment as one which is secure and controlled yet offers additional environmental dimensions which extend developmental possibilities. Children often spend a great deal of time in daycare facilities and schools, as parents are absorbed in their own work and leisure activities. This places an emphasis on architects and planners to consider the needs of children in great detail. As such, the children’s environment must be conceived of as a rich, complex place; a "world within a world". We use the word LANDSCAPE in recognition that children do not differentiate between the inside and the outside, private and public; every part of their perception is open to stimulation by a stimulating environment.

The New Zealand Employment Law Guide contains practical and easy-to-read coverage of employment law, together with precise references to statutory instruments and case law. It provides a comprehensive overview of an expanding and changing field of law, as well as directions for further investigation of specific issues. The Guide discusses employment law from both individual and collective perspectives. It covers the law on employment relations, employment agreements, working hours, remuneration, disputes, grievances, termination of employment, health and safety, discrimination and privacy. Significant decisions of the Employment Relations Authority and the courts are used to show how employment law is interpreted and applied in real life. A model individual employment agreement is included for readers to adapt to their needs, plus an outline collective agreement and the text of official codes of practice. This edition is based on the law in effect at 1 January 2013, together with key case decisions and developments in practice to that date.

The ‘outdoors’ is a physical and ideological space in which people engage with their environment, but it is also an important vehicle for learning and for leisure. The Routledge Handbook of Outdoor Studies is the first book to attempt to define and survey the multi-disciplinary set of approaches that constitute the broad field of outdoor studies, including outdoor recreation, outdoor education, adventure education, environmental studies, physical culture studies and leisure studies. It reflects upon the often haphazard development of outdoor studies as a discipline, critically assesses current knowledge in outdoor studies, and identifies further opportunities for future research in this area. With a broader sweep than any other book yet published on the topic, this handbook traces the philosophical and conceptual contours of the discipline, as well as exploring key contemporary topics and debates, and identifying important issues in education and professional practice. It examines the cultural, social and political contexts in which people experience the outdoors, including perspectives on outdoor studies from a wide range of countries, providing the perfect foundation for any student, researcher, educator or outdoors practitioner looking to deepen their professional knowledge of the outdoors and our engagement with the world around us.

Outdoor recreation programming is a growing and diverse field that requires administrators to be ready to work in complex and multidisciplinary environments. Outdoor Program Administration: Principles and Practices will help both seasoned and new administrators—as well as students and emerging professionals—flourish in various settings, including university, military, government, commercial, and nonprofit organizations. You’ll learn the best contemporary administrative strategies and practices from veteran professionals from the Association of Outdoor Recreation and Education (AORE). The AORE authors provide extensive coverage of all aspects of administrative duties and responsibilities from a diverse organizational setting. Outdoor Program Administration: Principles and Practices guides you in developing and sustaining programs in outdoor recreation settings across public, private, and nonprofit sectors. You will reap the benefits of the experience shared by the AORE authors, who also provide questions and critical thinking exercises that will enhance the materials and deepen your understanding. This reference explores all the issues pertinent to being a successful outdoor program administrator. The book has four sections: Outdoor Program Foundations, Program Design and Implementation, Staffing Considerations, and Facilities and Programs. Topics you’ll delve into include • designing and developing programs; • risk management and legal considerations; • budgeting and financial operations; • marketing and land access (permits); • environmental stewardship; • staff recruitment, supervision, training, and assessment; and • management of indoor climbing walls and challenge courses. Outdoor Program Administration: Principles and Practices presents material that will help you improve your administrative skills and enhance the programs you oversee. As such, it’s an essential book for your professional library.
